

Ed Fialkowski

Full Stack Web Developer

I enjoy building everything from landing pages to rich interactive web apps. I have a diverse set of skills on both back-end and front-end. I'm fluent in working with API's, Responsive Design, OOP, design structures, Agile development, page speed, and working remotely. With the right design, I can make anything.

Experience

Great Works Online, LLC

2013 - present

Freelance Web Developer

- Marketing By Mail - Allowed agents to order customized materials to reach targeted audiences through custom CMS and intuitive interface.
- My-policy.com - Enhanced homeowner marketing by automatically creating a customizable personal information page for all of an agent's contacts.
- Kloj.net - Website aggregator designed to make consuming the web more efficient and aesthetic.
- ContactMyReps.org - Accurate, live, exhaustive list of contact methods for US government representatives by combining data from many public sources.
- PapaSquat.net - Quickly find nearby spots to relax outdoors in Portland, Oregon using public data available from Portland Parks.

Northrop Grumman, Corp.

2010 - 2013

Web Developer

- National Geospatial Intelligence Agency - Manipulation and display of large spatial datasets. New functionality, speed improvements, and better reliability.
- GeoHome geospatial application platform - a cloud-based marketplace for on-demand access to applications, data, and tools for use in mobile and web frameworks.
- Community Initiative for Emissions Research Applications (CIERA) - Web applications and portals to help with conversion, storage, discovery, and efficient use of air pollution data. Design, develop, maintain, and administer web communities for communication and contribution between multiple teams including EPA and NASA.

Washington University in St. Louis

2006 - 2010

Web Developer

- Center for Air Pollution Impact and Trend Analysis - Lead developer for CIERA project.
